The First Report

I have read this paper with interest. I don't see any problem to publish it in the JVR except for few observations that I will list:

- 1) In page1, I suggest if it is possible that author change the sense of the last statement in the Abstract. For instance something like: "The article is proposed to be of assistance in unders....."
- 2) May be it will be good to insist en more examples of the accumulation property.

The Second Report
